

Alison R.M. Richins Project Title The Self-Sipper Objectives/Goals The goal of my invention was to create a cup for people who have difficu permanent or temporary disabilities. Methods/Materials After visiting a hospital I saw patients who required assistance drinking a tea-spooned into their mouths. At my school, there are students who need think of a way to foster independence of patients and students with limite drink on their own. Also I noticed that some patients could not suck liquid or stroke. I had to think of a way to get liquid into the mouth without suck Results	nd some who had liquids assistance drinking. I wanted to d abilities and allow them to ds through a straw due to surgery
<b>Abstract Objectives/Goals</b> The goal of my invention was to create a cup for people who have difficu permanent or temporary disabilities. <b>Methods/Materials</b> After visiting a hospital I saw patients who required assistance drinking a tea-spooned into their mouths.
