Project Title	1
Is the Voltage Created by Lemon Batteries Usable Energy?	
is the voltage created by Lemon Datteries Usable En	
Abstract	
Objectives/Goals	
Make a lemon operate a LED, a watch, and a small light bulb.	
Methods/Materials 4 galvanized nails	
4 small copper wires about 2 inches	
4 lemons	
8 alligator clips	
a multimeter	
a watch	
a small light bulb a LED	
Results	
The lemons were able to operate the LED and watch, but not the small light bu	lb.
Conclusions/Discussion	
The lemon was able to operate the LED and the watch because they had little re	
little voltage. The light bulb didn't operate because it had too much resistance a	ind too little current.
Summary Statement	
Making a lemon operate small electronics.	
Help Received	
•	d the columnized rolls. May
My dad helped me get the materials such as the copper wires, alligator clips, ar mom helped me get the lemons. My dad also helped me put the galvanized nail	
lemons.	is and copper whos mus the
